

HEALTH, SAFETY AND ENVIRONMENT POLICY

CHALPOINT gives the highest consideration concerning Safety, Health and Environment protection.

It is CHALPOINT's policy to undertake their activities according to internationally recognised engineering practices, giving priority to the Health and Safety issues during designing, constructing and commissioning of the plant.

CHALPOINT commitment in this matter include the following provisions:

➤ **During the design.**

- A comprehensive safety plan will be prepared with reference to the Quality Assurance Plan.
- Process design will put a high emphasis on plant safety including start up and shut down.
- Hazard and operability studies will be carried out at an early stage.
- Safety studies will be carried out including preliminary risk analysis, hazardous area study, fire and gas detection study.
- The best environmental protection in the design will be used to minimize any nuisance that may arise from the activities.
- Promote safety awareness and activities on the understanding that all accidents and that a zero target is the Company aim.
- Endeavour to ensure that all contractors apply the same standards for Health, Safety and Environment protection as that of the Company.
